PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications, AI-assisted tools, and C/C++ systems projects. Strong foundation in data structures, algorithms, and object-oriented programming, backed by a Udemy certification in DSA and LeetCode problem-solving. Proven ability to independently design, build, and deploy complete end-to-end projects, from UI/UX-focused front-end interfaces to database-driven back-end systems. Completed a Deloitte data analytics job simulation, reflecting strong analytical thinking. Seeking a software development or internship role to apply technical skills to real-world engineering challenges.

TECHNICAL SKILLS

Programming Languages C, C++, Python, JavaScript
Web Technologies HTML5, CSS3, JavaScript (DOM, ES6+)
Core CS Concepts Data Structures & Algorithms, Object-Oriented Programming, Problem Solving
Tools & Platforms Git, GitHub, VS Code, GitHub Pages

PROJECTS

Lumina Vision – Cinematic Brand Landing Page Personal Project
HTML5, CSS3, JavaScript | Deployed on GitHub Pages

- Designed and developed a cinematic single-page landing website for an automation-focused brand, combining strong visual storytelling with smooth, performance-conscious interactions.
- Implemented a custom animated cursor, scroll-triggered animations, a dynamic dark/light mode toggle, and an interactive lightbox gallery to elevate user engagement.
- Added a functional contact form and deployed the finished site to GitHub Pages, managing the full project lifecycle from design to live hosting.

HandSense AI – Gesture Recognition System Personal Project
Python | Computer Vision

- Built an AI-powered application capable of detecting and interpreting hand gestures in real time using computer vision techniques.
- Designed the processing pipeline to translate recognized gestures into defined system actions, testing performance under varied lighting and hand-position conditions.

Coffee 3D – Premium Brand Website Personal Project
Next.js, Tailwind CSS, Framer Motion

- Built a modern, responsive marketing website for a premium coffee brand using Next.js and Tailwind CSS, with Framer Motion for smooth page transitions and micro-interactions.
- Explored AI-assisted development workflows (Bolt.new, v0.dev) alongside a hand-built approach to evaluate speed versus design control trade-offs.

Bank Management System Academic Project
C++

- Developed a console-based banking application supporting core operations including account creation, deposits, withdrawals, balance inquiry, and transaction history.
- Applied object-oriented programming principles and input validation to structure account data into reusable classes while ensuring data integrity.

Library Management System Academic Project
C

- Built a file-handling based library management application in C with a menu-driven interface, supporting add, search, update, issue, and return operations, using file I/O to persist data between executions.

INTERSHIPS

Pluto Academy — AI & Machine Learning Internship June 2026 Remote
Completed AI & ML internship with hands-on project work; delivered EDA on the Netflix Movies & TV Shows dataset using Python, producing a Jupyter notebook with visualizations and insights.

EDUCATION

K.S.K.W. Arts, Science & Commerce College, Nashik Graduated 2026
Bachelor of Science in Computer Science (BSc CS) Nashik, Maharashtra
Savitribai Phule Pune University (SPPU)

CERTIFICATIONS

C++ Data Structures & Algorithms + LeetCode Exercises June 2025
Udemy — Instructor: Scott Barrett · 10 hours

Data Analytics Job Simulation January 2026
Deloitte (via Forage) — Data Analysis & Forensic Technology

Foundations of Programming with Python Sep–Oct 2025
ExcelR EdTech Pvt. Ltd. — 30-hour Live Training Program
